

COMMUNITY & AGENCY ENGAGEMENT

DKS Associates has a transportation-centric outreach practice to help our clients connect with their communities. We are keenly aware and actively engaged in a commitment to social equity and environmental justice, ensuring that all people, regardless of socioeconomic status, are able to participate in meaningful efforts that recognize the importance of multicultural participation.

THE DKS APPROACH:

Using cutting-edge technology and grassroots engagement, DKS customizes our approach for each outreach project. Developing effective programs to help agencies work successfully with other municipalities to develop regional solutions to transportation challenges is also of paramount importance. This includes collaboration on projects with mutual benefits and working proactively on investment efforts to ensure maximum funding from state and federal agencies is secured.

As a leader in transportation solutions for connectivity, transit, design, safety, and multimodal mobility, we recognize the importance in providing these industry-specific services to our valued clients and teaming partners. To enhance our core services, DKS has a creative services team that specializes in storytelling to transform complex engineering and technical information into easy-to-understand visuals.
